

Software Testing – Complete Tree Structure

1. Software Testing

Software Testing ensures that the software meets requirements and works correctly.

2. Main Classification

- 1 Functional Testing
- 2 Non-Functional Testing

3. Levels of Testing (WHEN testing is done)

- 1 Unit Testing
- 2 Integration Testing
- 3 System Testing
- 4 Acceptance Testing

4. Functional Testing (WHAT the system does)

- 1 Unit Testing
- 2 Integration Testing
- 3 System Testing
- 4 Acceptance Testing
- 5 Regression Testing
- 6 Smoke Testing
- 7 Sanity Testing

5. Non-Functional Testing (HOW the system behaves)

- 1 Performance Testing
- 2 Security Testing
- 3 Usability Testing
- 4 Compatibility Testing
- 5 Reliability Testing

6. Performance Testing Types

- 1 Load Testing
- 2 Stress Testing
- 3 Endurance Testing
- 4 Spike Testing

Conclusion

All these testing activities together are part of the Software Testing Life Cycle (STLC).
